Summary

Software Developer with hands-on experience engineering scalable full-stack applications utilizing React.js, Node.js, and JavaScript. Possess a strong foundation in Data Structures, Algorithms, and core Computer Science principles. Proficient in designing RESTful APIs, real-time architectures, and AI-driven platforms, alongside debugging complex distributed systems. Adept in Agile development methodologies, demonstrating a proactive learning mindset and the agility to master emerging technologies.

Education

Vishwakarma Institute of Technology, Pune

2022 – 2026

B.Tech in Electronics and Telecommunication Engineering (ENTC) CGPA: 7.76

Pune, Maharashtra

Projects

AI-Driven Real-Time Developer Collaboration System [\[GitHub\]](#)

React.js, Node.js, Express.js, MongoDB, Redis, Socket.IO, Google Gemini API

2025

- Engineered scalable RESTful APIs and real-time collaboration features, supporting **10+ concurrent users** with low-latency communication.
- Established robust authentication and authorization utilizing JWT and bcrypt, securing **100% of user endpoints**.
- Incorporated an AI assistant for automated code generation and debugging, decreasing developer effort by approximately **30%**.
- Streamlined backend performance via Redis caching, achieving a **30% reduction** in system latency.

VaniLink – Real-Time Video Conferencing App with AI Meeting Summaries [\[GitHub\]](#)

React.js, Node.js, MongoDB, Deepgram API, Google Gemini API

2026

- Architected a video conferencing platform accommodating **15–25 simultaneous users per session**, leveraging WebRTC and LiveKit architecture.
- Embedded the Deepgram API to enable live speech-to-text functionality, attaining **95%+ transcription accuracy** with sub-second latency.
- Deployed AI-powered summarization capabilities to extract and deliver actionable meeting insights.

Email Validation and Verification System [\[Paper\]](#)

Python, JavaScript, SMTP, DNS, Streamlit

2024

- Programmed a Python-based email verification tool leveraging SMTP, DNS lookups, and MX record validation.
- Executed bulk email validation processes with optimized processing logic, boosting overall efficiency by **40%**.
- Designed an interactive Streamlit dashboard to provide real-time validation feedback and analytics.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Redux, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub

AI / Emerging Technologies: Generative AI (GenAI), Agentic AI, Prompt Engineering, LLM Applications

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, System Design

Publications

Comprehensive Email Verification and Validation Using SMTP, DNS, and MX Records – ICICT 2025 [\[Certificate\]](#)

Academia360: A Centralized Research Platform – ICASST 2026 (Presented)

Experience/Leadership

Personality Development Club, VIT Pune

2025 – Present

Head

Pune, Maharashtra

- Directed the planning and execution of large-scale events for **600+ participants**, ensuring seamless operational logistics.
- Collaborated with faculty, alumni, and external stakeholders to drive successful and impactful event outcomes.
- Supervised cross-functional teams and optimized logistical workflows, significantly elevating overall event efficiency.
- Facilitated professional development workshops, actively boosting student engagement and community participation.
